“It is our job to identify and support impactful agrifoodtech startups, so that they can tackle the biggest challenges within the European food system, transform it and develop their capacity as founders. Through our EIT Food Entrepreneurship programmes we create connections right across the food ecosystem, empowering entrepreneurs to develop new ideas and innovations, helping them to launch accelerate and scale.”

Benoit Buntinx

Director of Business Creation at EIT Food

“This partnership agreement between EIT Food and FTH LATAM for the region is focused on the development of AgriFoodTechs and will give Brazilian and Latin American startups access to Europe’s largest innovation ecosystem, technology validation methodologies, international mentors, global investors. A two-way agreement will also provide European startups access to the Brazilian and Latin American market. Paulo Silveira CEO Foodtech Hub LATAM”

We are thrilled to announce our first ever Brazilian cohort of 8 outstanding agrifoodtech startups into the Food Accelerator Network programme.

“We're excited to welcome these outstanding startups into our 2024 cohort. Not only are we extremely grateful to the startups for trusting us with their application and to our EIT Food Accelerator Network community, but also to the 60+ evaluators, our delivery and corporate partners for their continuous support and tremendous effort. By partnering with the best and the brightest talents in agrifoodtech, we continue to offer purpose-led startups even more ways to fuel their impact, build strong business foundations, thrive and achieve their ultimate goals: a successful market adoption.”

Marie Russier

Programme Manager of the EIT FAN

“It is a deep honour to bring, for the first-time to Brazil, an acceleration programme that has already brought numerous incredible results to European agrifood startups and is lead and promoted by the renowned institute EIT Food. We are very excited to see the impact of the programme on startups that have already been excelling in the market and that, through knowledge, expertise, and exchange with our amazing team of mentors, investors, and major corporations, can reach a new level of business maturity.”

Matheus Marques Jaccobsen

FAN /FTH Programme Manager BRAZIL HUB

Designed to drive growth, credibility, exposure and recognition, the Food Accelerator Network programme helps impactful agrifoodtech startups to accelerate the transition from an early-stage company to an investment and market ready business.

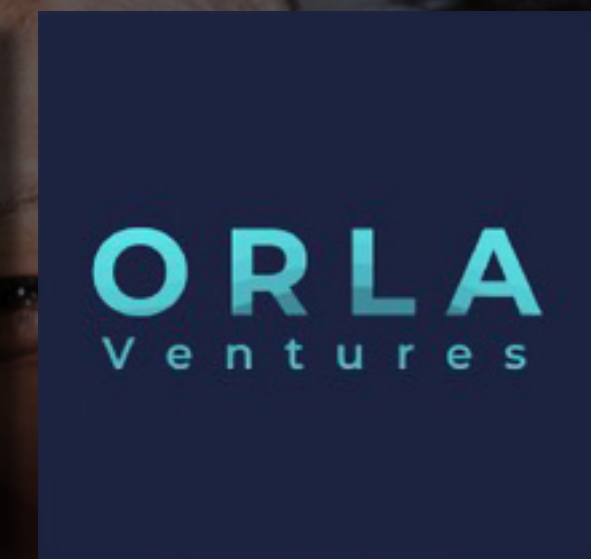

The Food Accelerator Network Brazil Hub supports and accelerates startups and innovations specialising in next-generation plant-based food solutions, sustainable food packaging, and food bioprocessing, driving the transformation of our food system towards a more sustainable and healthy approach.

The selected startups get privileged access to the world's largest and most dynamic food innovation community, to cutting-edge facilities and equipment, routes to financing and corporate partnerships. Not only that, we connect impactful agrifood startups with industry-leading corporates, mentors and research partners, to validate and (re)shape their product development roadmap, test and pilot their innovative technologies and drive the ultimate goal of every business: a successful market adoption.

The Food Accelerator Brazil Hub is delighted to announce its 2024 Corporate Partners and Investors: **Cargill, Duas Rodas, Mondelez International and Orla Ventures.**

We are proud of our corporate partners and investors for the critical role part they play in the food system transformation.

Our Food Accelerator Network Corporate Programme Partners will be working closely with our Brazil Hub, sharing their expertise with the 8 startups on their tech validation and business acceleration journey.

- FOOD BIOPROCESSING
- NEXT GENERATION OF PLANT-SOURCED SOLUTIONS
- SUSTAINABLE FOOD PACKAGING

BRAZIL Hub

The Food Accelerator Network Brazil Hub supports and accelerates startups and innovations specialising in next-generation plant-based food solutions, sustainable food packaging, and food bioprocessing, driving the transformation of our food system towards a more sustainable and healthy approach.
